What is PHYSIO 2023?

- With the rapidly advancing pace of technology, Physical Therapy practice owners must keep up-to-date with the latest innovations to stay competitive in attracting patients.
- Advancements in areas such as virtual care, robotics, and the gamification of treatment have already improved patient care and provided greater flexibility.
- If you are thinking of upgrading the technology in your PT practice to attract more patients, attending the Physio 2023 conference is highly recommended.

Actionable Content

PHYSIO 2023 promises to deliver actionable content that can be immediately applied to your practice. Our speakers are experts in their fields, and their talks will provide you with practical tools, tips, and techniques that you can use to improve patient care, increase efficiency, and grow your business

Inspirational Speakers

Get ready to be inspired by the world-class speakers at Physio 2023. Our lineup of experts is handpicked for their extensive knowledge and experience in Physiotherapy & Rehabilitation Medicine, and their talks are planned to inspire, motivate, and challenge you to think differently.

Network, Entertainment & Fun

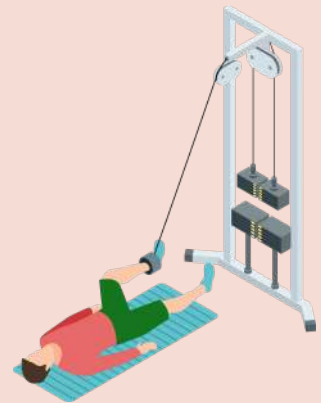

And when the day's work is done, we've got some unforgettable entertainment lined up for you. Step aboard a traditional dhow for a magical dinner cruise along the Dubai Creek and take in the stunning views of the city's skyline. Then, gear up for an adventure-packed 4x4 desert safari, where you'll experience the thrill of dune bashing and witness a beautiful sunset over the sand dunes.

Why DUBAI?

The physical therapy market in the UAE has seen steady growth in recent years, driven by factors such as an increase in lifestyle-related injuries, an aging population, and a growing awareness of the benefits of physical therapy. According to a report, the PT market is expected to grow at a compound annual growth rate of 6.1% between 2020 and 2025, reaching a value of USD 293.14 million by 2025. The report also mentions that the private sector is the dominant provider of physiotherapy services in the UAE, with government initiatives aimed at improving healthcare infrastructure and promoting healthy lifestyles driving further growth.

Additionally, the growing availability of specialized treatments and technologies, such as robotic rehabilitation and virtual care, is expected to further boost demand for physical therapy services in the UAE. Overall, the physical therapy market in the UAE presents promising opportunities for PT practitioners and investors alike.
