Theme: Current Research Trends in Neuroscience and Brain Disorders

Address: Coalesce Research Group, 33 Market Point Dr, Greenville, SC 29607, USA

WELCOME MESSAGE FROM DR. YUKIO YONEDA

Dear Friends and Colleagues,

"Welcome Message from Plenary Lecturer As a Plenary Speaker in the forthcoming conference, I am honoured and delighted to invite you to attend the World Congress on Neuroscience and Brain Disorders, which is to be held during March 30-31, 2020, in Osaka, Japan. Brain Disorders 2020 brings together academic and industry colleagues, scientists, researchers, students and regulatory experts from around the globe with the cutting-edge information and technology for the further development of Neuroscience. I myself have visited the city of Osaka on conferences as well as sightseeing uncountable times from my childhood, which invariably provides me with both educational and fascinating new experiences. I was able to acquire a great deal of knowledge of the old history and modern culture of the city of Osaka as a jam of the tradition and the modernism on my every visit. Osaka was built in 794 and since then has been a capital city of Japan for more than one thousand years. Additionally, domestic and overseas participants could also enjoy themselves with a variety of attractive beauties and spots as a tourist before or after the congress in Osaka. The World Congress on Neuroscience and Brain Disorders is designed to bring forth the most up-to-date information for the development of Pharmacology and Neuroscience. Key aspects will include drug discovery and drug screening, as potential new medicines are identified through these processes.

Please join your peers from around the world for this wonderful opportunity to reach the large assembly of participants from the Pharmacology and Neuroscience community, meet with thought leadership experts, share your new research, and show off your cutting-edge technology at this 2-day event.

I indeed look forward to seeing you in Osaka, Japan, at the "World Congress on Neuroscience and Brain Disorders".

Your presence and deliberation will make this conference remarkably successful in all aspects of Neuroscience and Brain Disorders. Let's meet in Osaka soon! "

Yukio Yoneda, PhD

Professor Emeritus, Kanazawa University

Professor Invited, Osaka University President,

The Institute of Prophylactic Pharmacology

ABOUT COALESCE RESEARCH GROUP

Coalesce Research Group is a USA based emerging open access publisher and International Conference Event organizer which owe to serve the scientific community by serving the high quality genuine research work from eminent scientists, professors, scientific research communities in all fields of medicine, clinical, life science, engineering and technology to the Research Scholars, Students, Libraries, Educational Institutions, Research centres and industries with the aim of "Enhance your Research" in the respective fields. Our aim is to create ideal platform for scientific community in which providing free access to all the new research through our international standard journals globally without any restrictions.

WHY CHOOSE US?

- Presenting Your Organisation's Work on a Global Platform
- Discuss and Overcome Issues in your Field by Expert Advice
- Network with Experts from the Sector
- Learn From Other Speakers
- Chairing/ Co-chairing a Session
- Meeting the new People from 22+ Different Countries
- Increasing your Scope of Knowledge
- Competitive Advantage
- Opportunity to Collaborate and Sponsor

WHO'D BE ATTENDING?

- Neurologists
- Neurosurgeons
- Psychiatrists
- Brain researchers
- Neuro Oncologists
- Psychologists
- Neurology Organizations
- societies
- Business delegates
- CEO's
- R&D Heads from Industries
- Pharmaceutical companies
- Professors
- Students

CONFERENCE HIGHLIGHTS:

- Epilepsy
- Autism
- Brain Cancer and Tumors
- Parkinson's disease
- Neuro-immunology of Brain
- Cognitive Neuroscience
- Structural and Functional Brain
- Brain and Spine
- Neuroimaging
- Psychiatry and Psychology
- Psychosomatic medicine
- Cerebrospinal complications
- Depression
- Neurosurgery
- Neuro-degeneration and Aging disorder
- Brain Nursing
- Pediatric Neurology
- Dementia
- Neuropharmacology
- Alzheimer's disease and Mental Health
- Animal models in brain research
- Computational brain and brain engineering
- Addiction and Brain disorders
- Anxiety
- Analysis, Assessment and Diagnosis of brain disorders
- Neurophysiology
- Novel Therapeutic Strategies

ABOUT

OSAKA, JAPAN

Osaka is Japan's second biggest metropolitan zone after Tokyo. It has been the financial powerhouse of the Kansai Region for a long time. Osaka was once in the past known as Naniwa. Prior to the Nara Period, when the capital used to be moved with the rule of each new head, Naniwa was at one time Japan's capital city, the first historically speaking known.

In the 16th century, Toyotomi Hideyoshi picked Osaka as the area for his stronghold, and the city may have turned into Japan's political capital if Tokugawa Ieyasu had not ended the Toyotomi hereditary rule after Hideyoshi's passing and moved his administration to inaccessible Edo (Tokyo).

CHERRY BLOSSOM FESTIVAL:

The Japanese cherry blossom, or sakura, has long been adored by people across the globe. It is regarded as a symbol of renewal, vitality, and beauty. During the spring season of each year, thousands travel to Japan to view the wondrous spectacle of these white or pink flowers blooming en masse.

Japanese families also eagerly await this time. Many attend cherry blossom festivals or simply enjoy hanami, the tradition of viewing and enjoying the beauty of the cherry blossom. Many people indulge in picnics beneath the blooming cherry trees.

THINGS TO DO IN OSAKA

- OSAKA
- Universal Studios
- Shinsekai
- Osaka Aquarium
- Abeno Harukas
- Minami (Namba)
- Kita (Umeda)
- Tenjin Matsuri
